attorney general has received cablegrams from Messrs. Day and Russell, who went to Paris as his representative to conduct the closing negotiations for the Panama canal property, to the effect that the deeds of the property, archives and all other papers and documents which will belong to the United States under the transfer have already been turned over to them and that the purchase price of \$40,000,000 has been advanced to the canal company by a Paris syndicate of bankers. This syndicate, it is understood, offers to pay over the money with a view to expediting the consummation of the sale on the assurance of the attorney general that the draft of the syndicate on he United States for the \$40,000,000, would be honored on presentation at the treasury at Washington.

At the time the money was paid over to the canal company in Paris, Maj. Mark Brooke, of the engineer was authorized to formally receive the property on the isthmus in the name of the United States. Whether this transfer has actually been made by the Republic of Panama the department of justice has not yet been advised, but it is assumed it will be made within a day or two. Messrs. Day and Russell are expected to return to Washington withing the next ten days and will bring with them the title deeds of the canal property.

Though sympathizing with the efforts of the European holders of Colombian bonds to induce the new state of Panama to assume some share of the foreign indebtedness of Colombia, the state department has made no move in that matter since the re-tirement from Washington of M. "The surgeons were Dr. Henry H laskell and Dr. Hefferman and the patient was a young man who has been suffering for some time with an iffection which partially distroyed the color of his eye, but only in the lightest degree affected its sight.

"The iris contained a white streak almost its entire width. Two drops of a 2 per cent. solution of cocaine were put under the eyelid in preparation for the operation. The instrunents used consisted of five ordinary ambric needles. These were applied o the cornea, making a large number of holes of the tiniest size. Minute mantities of India ink, previously shaded to match the iris as nearly as possible, were rubbed into the cornea with the finger, and in this manner worked into each of the holes made by the needle points.
